Continental CONTITECH

WE CAN PRESSURE TEST YOUR HOSES UP TO 36,250 PSI

NEW CAPABILITY AT GOODYEAR RUBBER PRODUCTS!

BE2500PLC TEST BENCH HIGHLIGHTS

PROVEN QUALITY ASSURANCE
Ensures every hose assembly is pressure-tested to meet safety and performance standards

HIGH-PRESSURE TESTING CONFIDENCE
Capable of testing assemblies up to 36,000+ PSI for demanding hydraulic applications.

DOCUMENTED TEST RESULTS
Provides printed or USB-saved test reports for traceability and customer verification.

CONSISTENT, REPEATABLE TESTING
Automated system delivers reliable, uniform results across every hose assembly.

INCREASED PRODUCTION EFFICIENCY
Ability to test multiple hose assemblies at once speeds up Turnaround times.

DESIGNED FOR SAFETY & RELIABILITY
Enclosed testing system minimizes risk and ensures dependable operation.

*THIS NEW CAPABILITY IS NOW AVAILABLE AT OUR CLEARWATER LOCATION AND CAN BE ACCESSED THROUGH ANY OF OUR STORE LOCATIONS.

PC1000-P Crimper

Description

The PC1000-P is a high-volume, high-capacity stationary crimper utilizing the fully automatic ACT3™ microprocessor controller. The PC1000-P can produce 1,415 crimps per hour with 450 tons of crimping force to allow for both Hydraulic and Industrial hose assemblies, ideal for production assembly applications. The standard PC1000-P crimper includes a 7.5-HP, 230-V/AC, 3-phase hydraulic pump.

Features

- Fully automatic ACT3™ controller
- Manual and automatic operation
- Utilizes the PC200/400 dies with easy-to-change die tool
- 350-ton cylinder
- Built-in heavy-duty base with die holders
- Allows for 1,415 crimps per hour
- Automatic shutoff for precise crimps
- Power return stroke and return limit control

Capability

- Up through 2½" ID, 2-braid, 4-spiral and 6-spiral hydraulic hose
- 3/16" through 10" ID industrial hose

Power Source

- Standard: 7.5-HP, 230-V/AC, 3-phase, 60 Hz
- Optional: 7.5-HP, 460-V/AC, 3-phase, 60 Hz

Dimensions

- Master die inside diameter – 230 mm
- Master die opening w/o dies – 350 mm
- Maximum swaging diameter – 192 mm
- Maximum die opening – 125 mm
- Machine size: 30" L x 44" W x 74 " H

Weight: 6,185 lb. (2,806 kg)
